We empower schools to transform education and build a future-ready teaching-learning ecosystem

Next.LMS

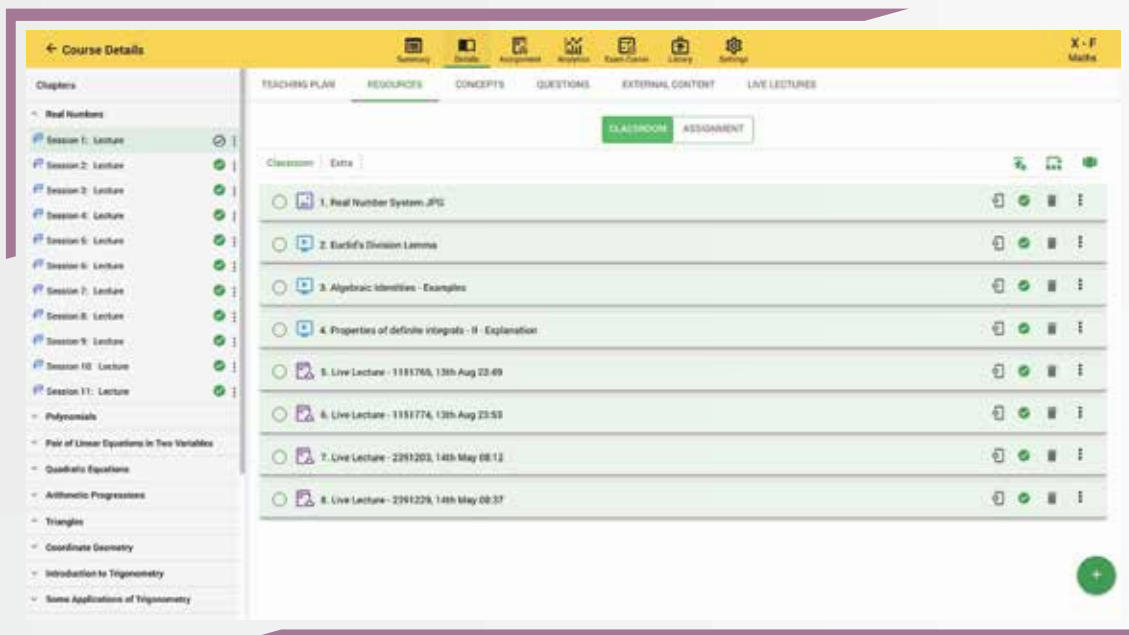

A tool for unmatched academic experience

1

Automated Course Planning

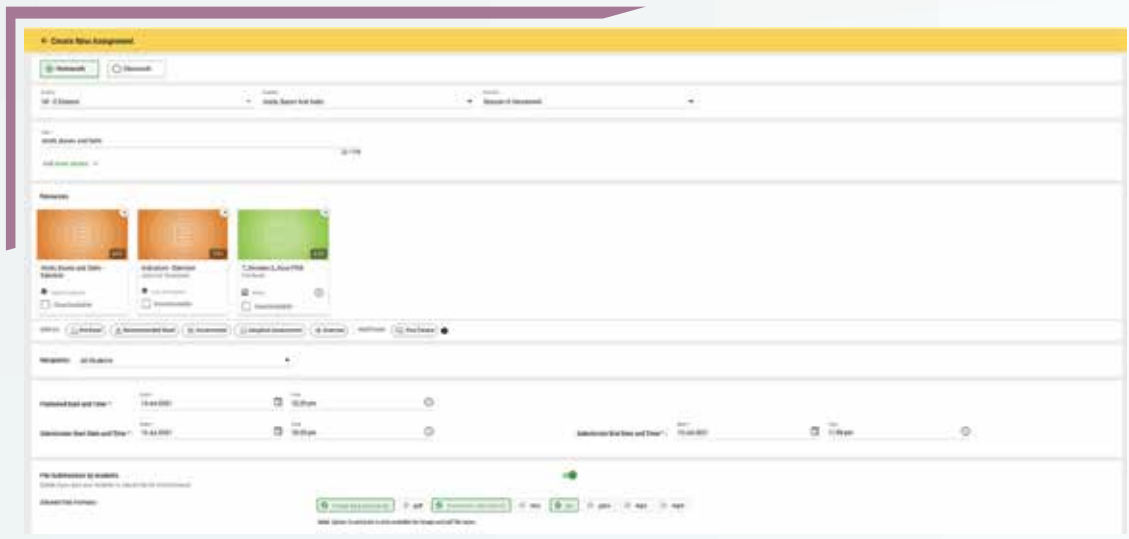

Teachers have access to pre-created lesson plans along with Next Education's standard lesson plans that cater to CCSS, NGSS (American Curriculum), Cambridge National Curriculum, IB (British Curriculum) and other Indian curricula.

2

Homework Solution

Teachers can customise homework for every child according to their individual learning needs. The module also allows them to send regular alerts to parents about homework with accurate feedback to fill the learning gaps. Homework can be individually assigned or in a group.

3

Auto-Recorded Live Lecture

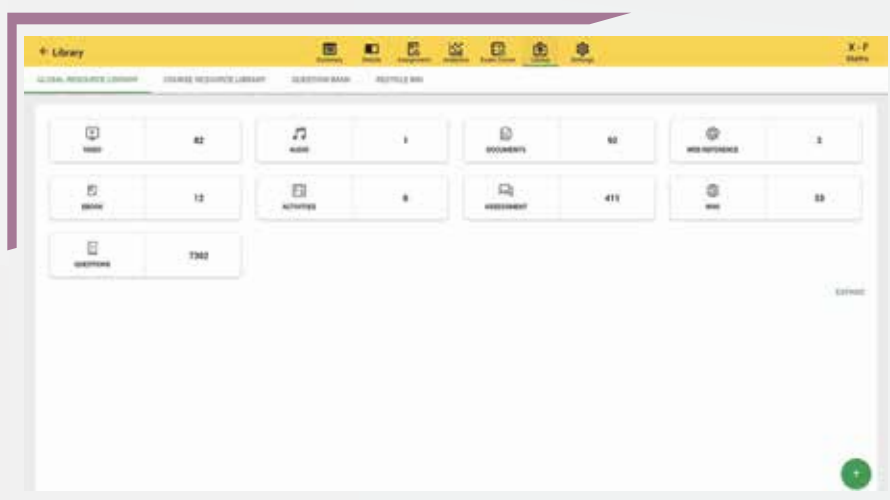

- Simulates a real classroom-like experience online
- Automatic attendance & AI-enabled attention monitoring
- Teachers can deny entry to strangers and prevent students from posting links to the chat
- Integration with third-party video conferencing tools like Zoom, Google Meet and Microsoft Teams
- Students can access recorded live lectures from their LMS workspace any number of times so that students never have to miss a class again

4

Resource Library

The teaching-learning process is enhanced with our award-winning digital content for teachers and students to teach and learn from easily. Along with **540,000+** questions, **25,000+** learning modules and **6,000+** experiments & simulations, teachers can also create and publish their own digital content through Next Studio. Teachers also have access to SCORM & LTI-compatible content from which they can pick and choose the desired material.

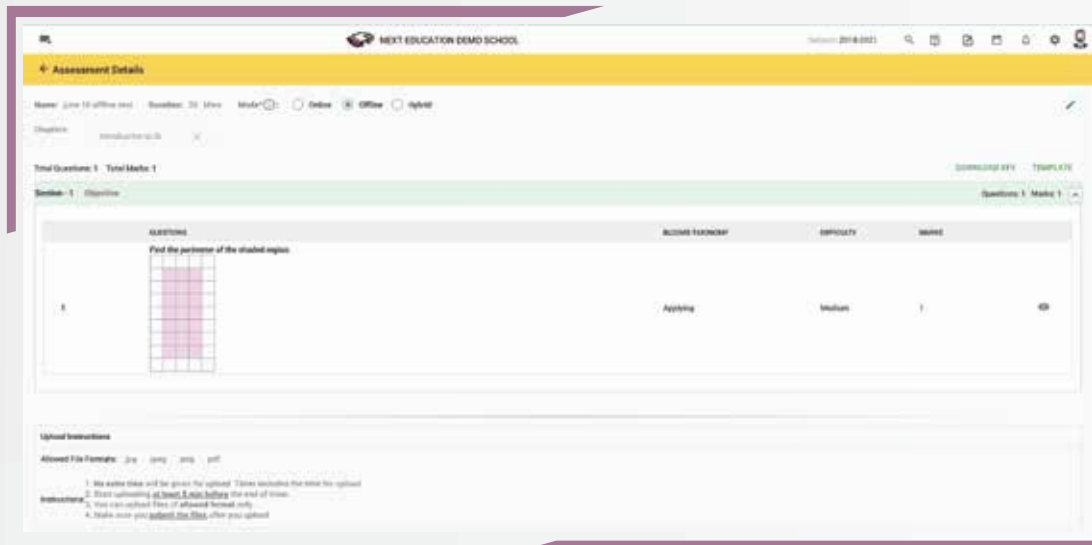

5

Personalised Assignments

NextLMS facilitates personalised homework allocations for every student. It allows teachers to assign tasks based on students' abilities, ensuring that they learn to their full potential. Teachers can also give individual or group tasks, track submissions and give instant feedback.

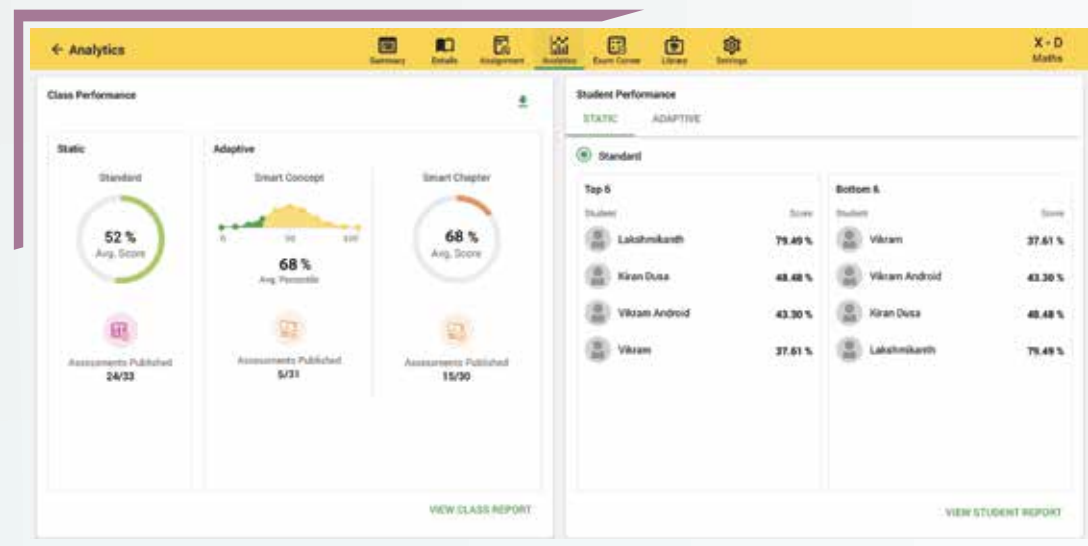

6

Progress and Performance Reports

With NextLMS, teachers can get an instant report of individual and overall academic performances. It is further broken down into subject, chapter and concept-wise performance analysis.

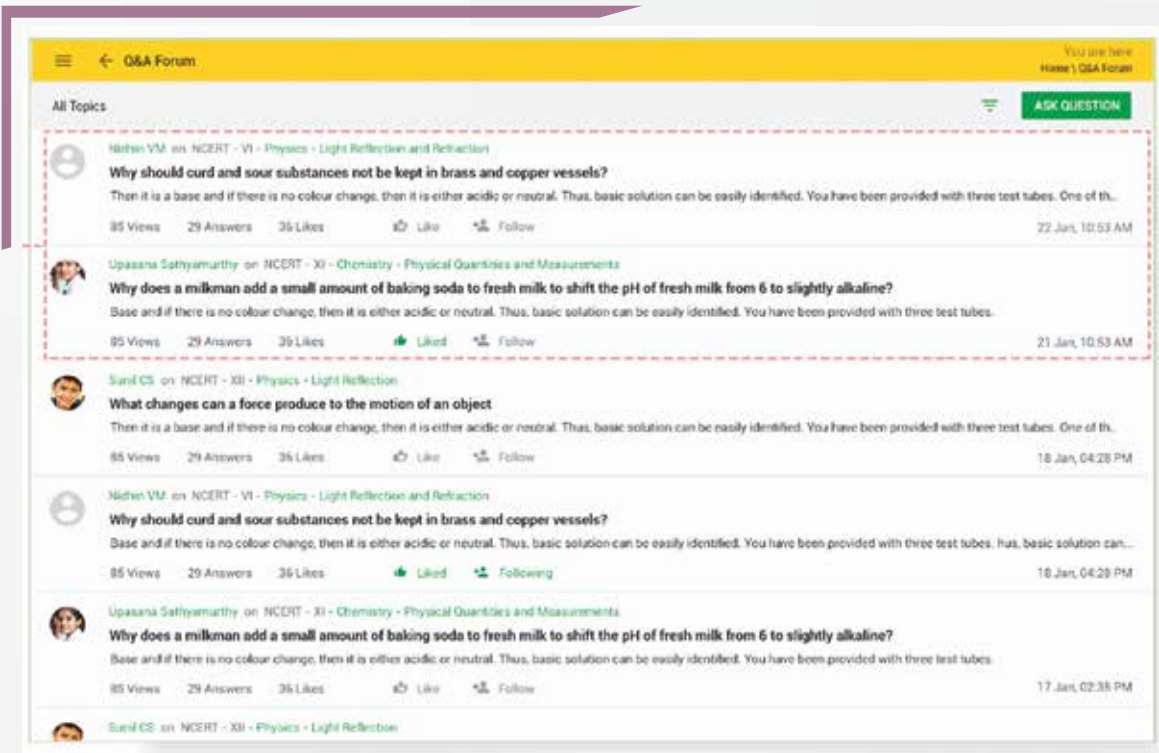

7

Question and Answer Forum

NextGurukul, a unique platform for teachers and students to collaborate, leading to a better exchange of knowledge. It is a space for every school to create its own interactive platform at class and subject levels.

Compatible with third party tools

Next. AssessmentTM

Cloud-Based Online Assessment Platform Secured With State-Of-The-Art AI Proctoring

1

Question Management System

Knowledge testing is spread over a wide range where teachers can choose from **540,000+** questions. Each question is tagged based on the difficulty, depth of knowledge and Bloom's taxonomy level.

- Teachers can choose to test through MCQs, activity questions, fill in the blanks, subjective questions and more
- Teachers can also upload custom questions based on their requirements
- Schools can create their own question bank and bulk upload it on NLP
- They can create and upload questions for assessments
- They can even tag questions to different Bloom's taxonomy levels and depth of knowledge
- The system is compatible with all languages and symbols

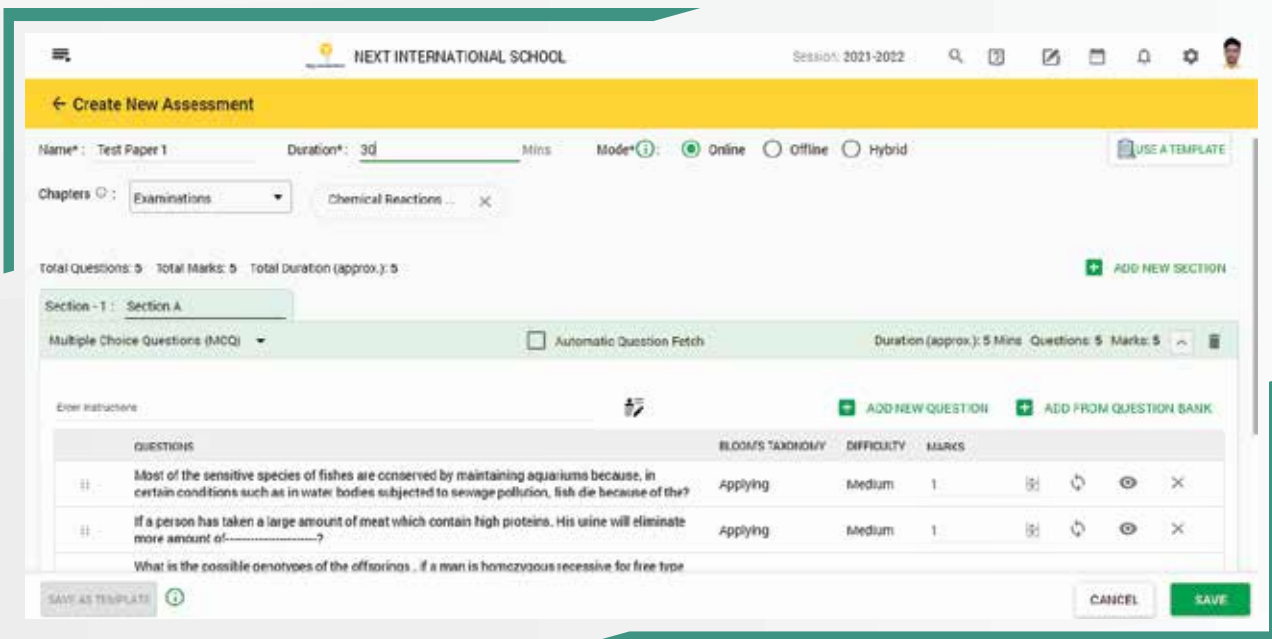

2

Assessment Generator

Next Learning Platform makes the assessment journey a breeze and a teacher can create assessments in as few as just 3 clicks! Teachers can use pre-created templates or use their own. Teachers can also use the automated assessment creator that makes designing assessments a seamless process!

3

Examinations

Examinations at NLP are customisable and test creation is not time-consuming anymore. Teachers can **design a variety of exam structures** in a few simple steps from preloaded templates.

- Teachers can **customise tests** in the online, offline and hybrid modes
- Teachers can either use pre-created **templates** or create **their own exam templates**
- Modify the due date of the exam and allow students to take retests
- Freedom to choose the submission window, shuffle questions, allow multiple attempts and schedule a time for taking and submitting the test
- In an offline test, students have the facility to upload their handwritten answer sheets in-app

To simplify a teacher's job further, **Gradebook Integration:**

Eliminates manual entry of marks

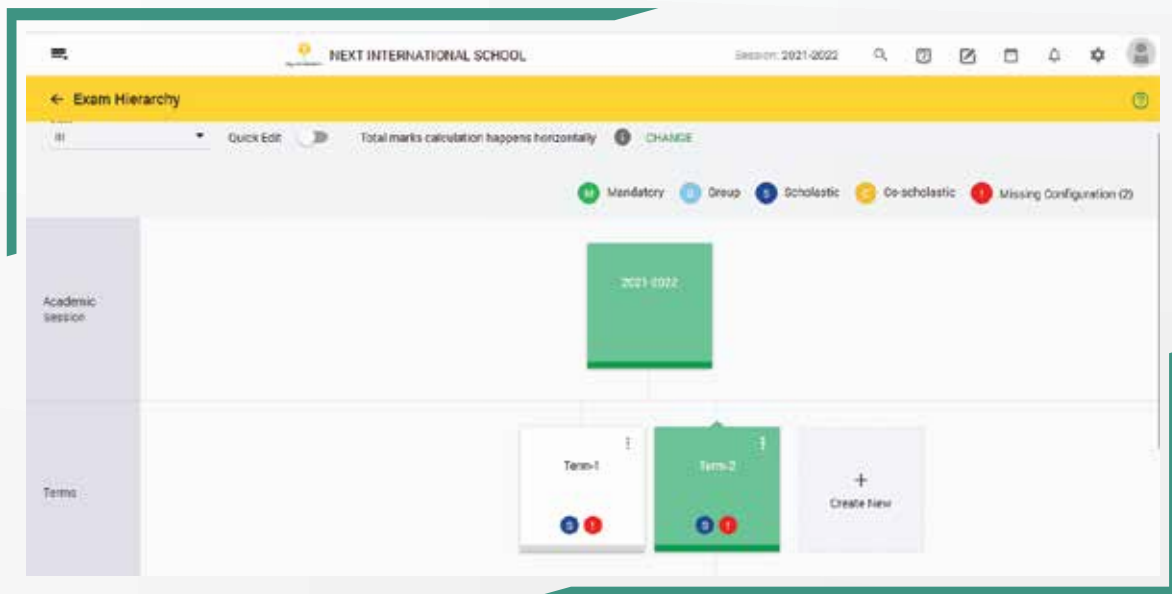

Facilitates mapping assessment scores across subjects

Generates monthly and annual progress reports instantly

Makes annual report card generation automated

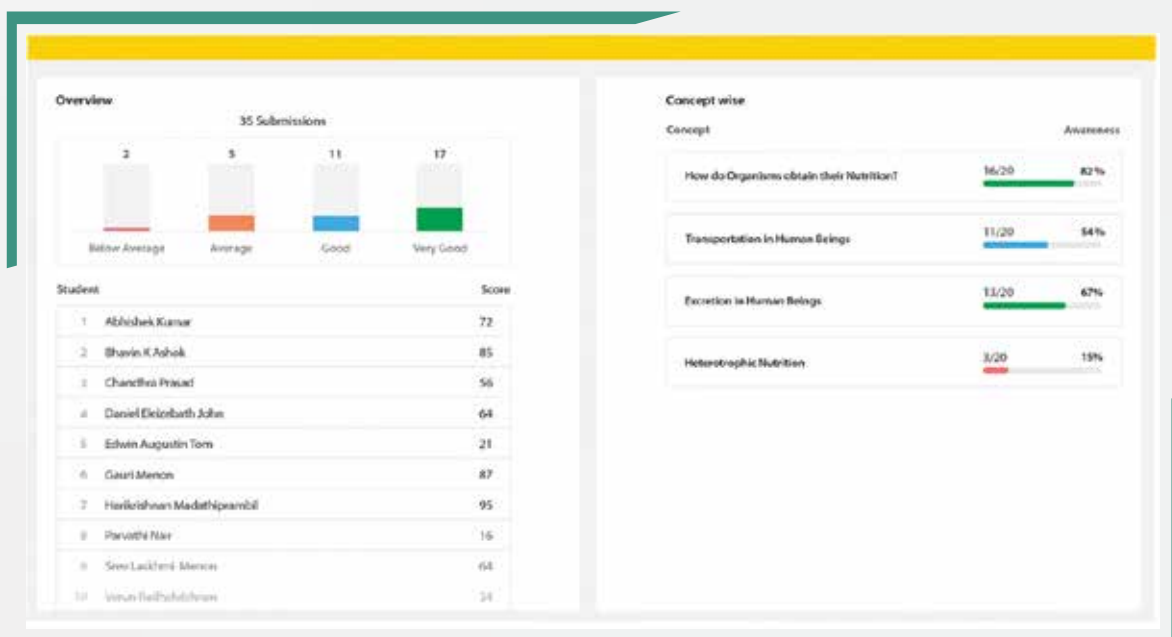

4

Adaptive Assessment

Powered by AI-ML, it adapts to the learning needs of every student. The assessment automatically generates questions on topics that are either more difficult or easy, based on the student's responses to previous questions.

It offers two kinds of tests:

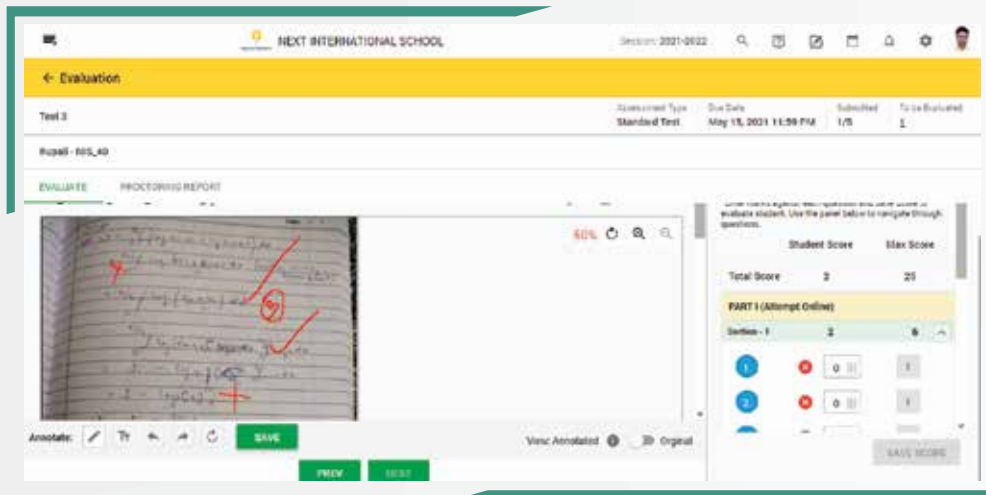

- **Smart Concept Test** based on Item Response Theory to determine the concept-level understanding of a student in a particular chapter.
- **Smart Revision Test** based on Knowledge Space Theory to analyse a learner's ability to understand an entire chapter by linking various concepts within it.

5

Assessment Evaluation

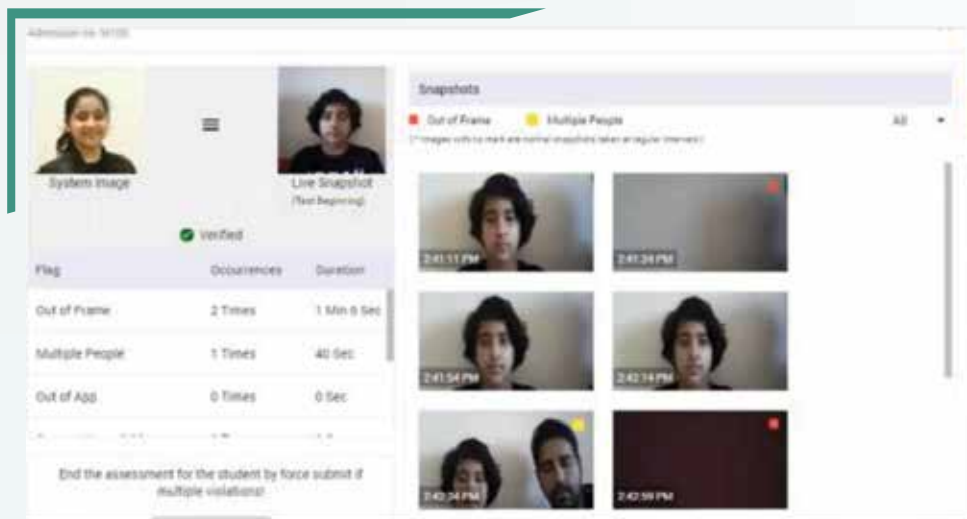

NextLMS takes evaluation a step ahead by automating the analysis of objective questions. Not just that! Teachers can go for an onscreen evaluation of subjective questions with the help of annotation tools.

6

Proctoring in Assessments

NextProctored Exam gives teachers the relief of automated monitoring during tests with live feed and facial recognition to prevent impostors. A comprehensive proctoring report is generated at the end of the assessment containing flags raised for violations like switching tabs or windows, minimising or coming out of the full screen, etc. It ensures better control during online invigilation by letting the teacher interact, warn or make announcements through live chat or video call. They are also given the power to terminate the exam for a student indulging in malpractice even after multiple warnings.

7

Student Data Analytics and Skill-Based Progress Reports

Next Assessment's intelligent and thorough reports help teachers give individualised attention and feedback to the child depending on the results.

- Teachers can create **actionable, personalised report cards** for every student while having access to a real-time view of the **overall class performance**
- System-generated **personalised remedial action plan** for every student based on their performance
- **Predictive analytics** points out the strengths and weaknesses of students in different subjects which teachers can use to recommend corrective measures.
- **Caliper analytics** helps teachers get an idea of the educational resources used by students, their **learning time, assessment scores and ERP data**

School Management Simplified

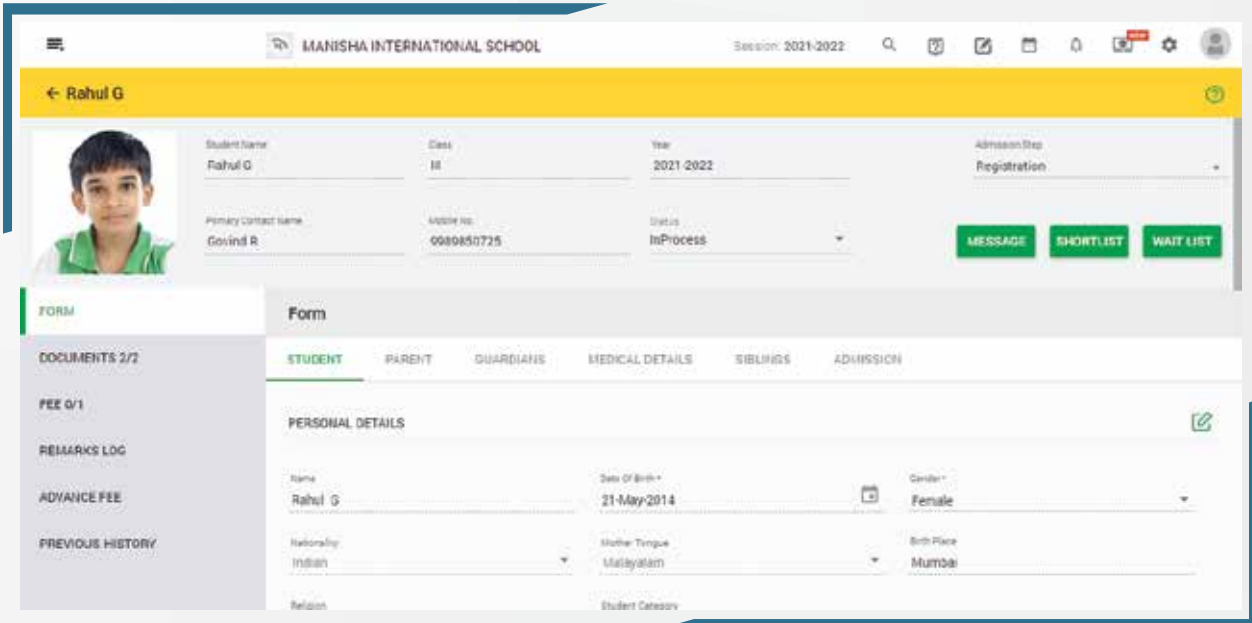

1

Hassle-free Admission Process

Go paperless by digitising form filling, document uploads, prospectus, application screening, admission, year-round enquiries and fee collection.

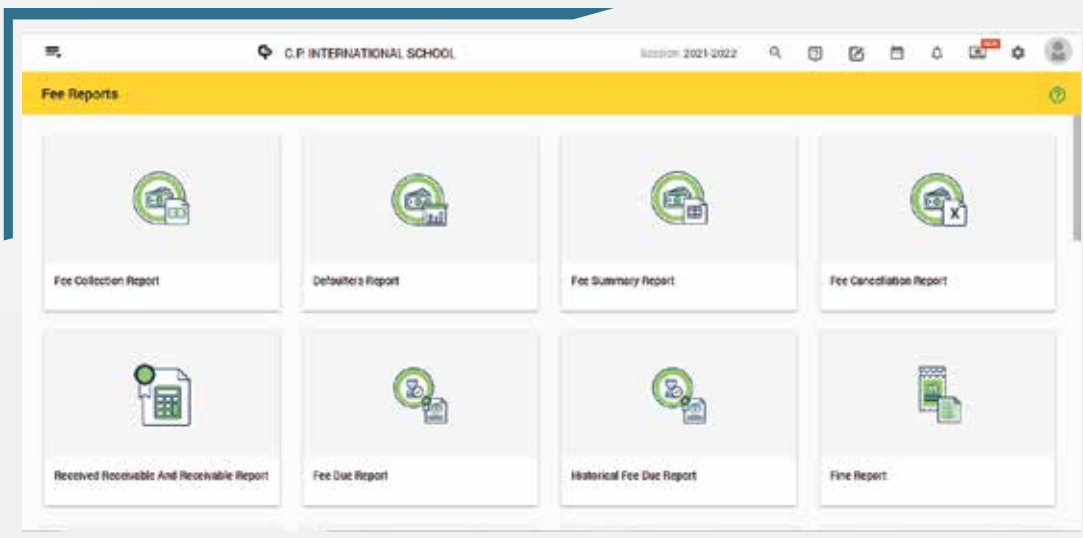

2

Fee Management & Online Payments

The module simplifies fee payments while providing financial protection through a secure payment gateway. Parents can easily view all transactions, receive timely reminders for fee payment and instant fee payment receipts through email or app. It is an easy to use module that provides users with multiple options to make and track payments.

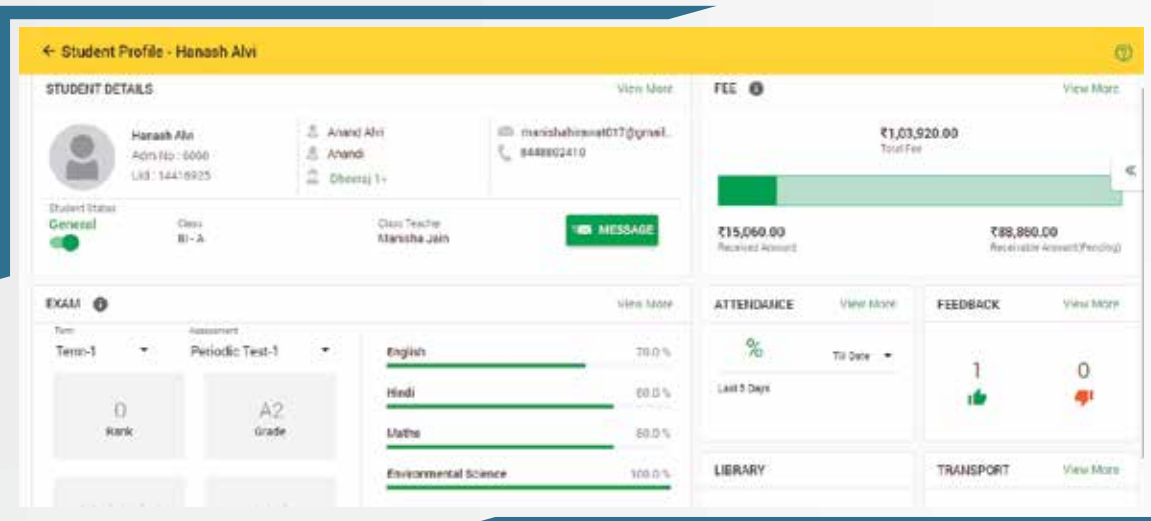

3

Comprehensive Student Profile

The module provides single window access to the personal and academic profile of a student along with assessment reports, academic reports, transfer certificates and marksheet. They are safely stored on the AWS cloud server that is accessible in just a click.

Real-time Attendance Management

Changing the process of attendance recording, NextERP facilitates online attendance recording with an automatic face recognition system. On the other hand, physical attendance tracking is made possible through RFID readers or biometric systems for teachers, school officials and students.

5

Streamline Examination and Report Generation

Teachers/administrators can design any type of examination structure and assessment pattern for the whole academic year in a few clicks with the help of pre-loaded templates. The solution also enables schools to create personalised report cards for each student. Notifications of the reports are sent to parents regularly.

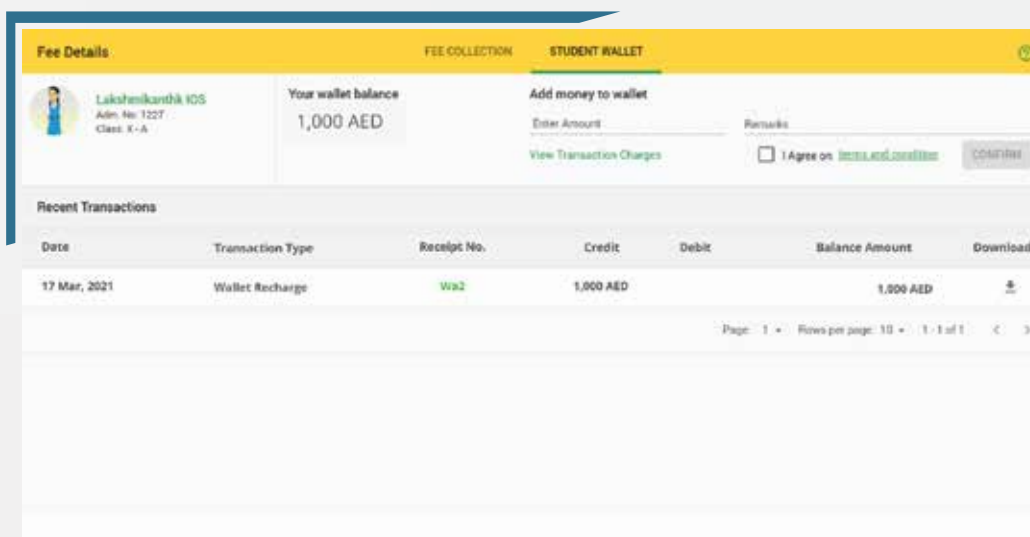

6

Student Wallet

Schools can go cashless with this feature of Next ERP. It allows parents to reach out to their ward's wallet for financial transactions like fee collection, inventory purchases, etc. Parents can also make an advance deposit amount for new admissions or to retain them in the next academic year.

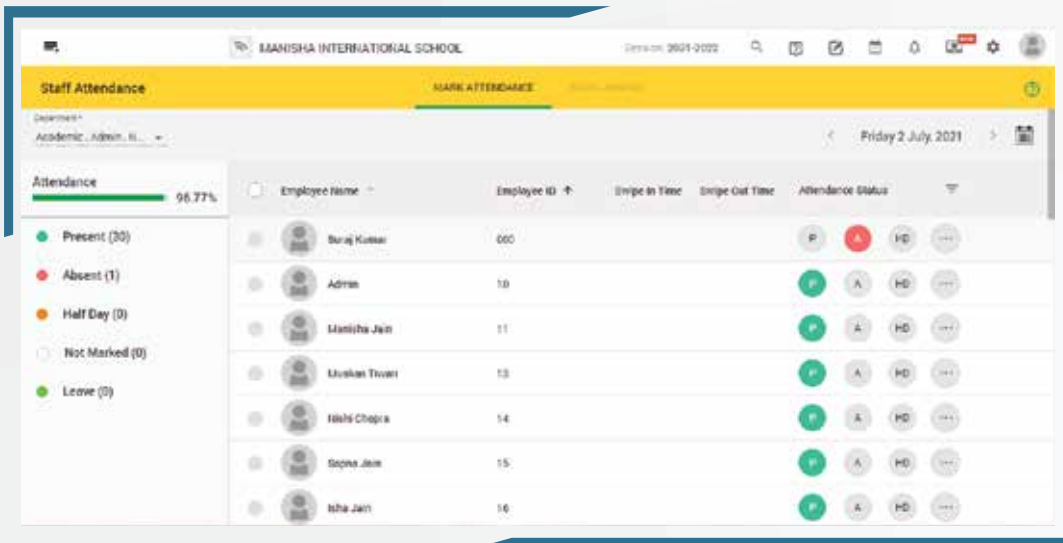

7

Transparent Staff Management

This module is created to take care of management's responsibility towards their staff. Here, all information related to staff like personal information, education background and previous employment is easily accessible to them. Through NextERP, the school can maintain transparent HR processes and ensure effective staff management. There is also a role-based dashboard for different stakeholders that can be used as per their requirements.

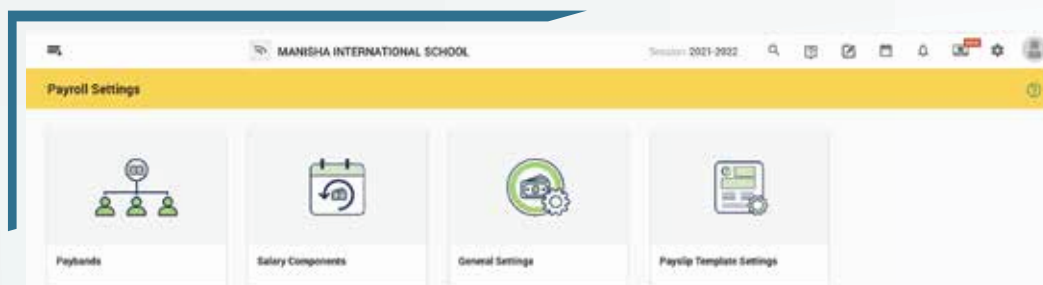

Attendance	Employee name	Employee ID	Swipe In Time	Swipe Out Time	Attendance Status
Present (30)	Buraj Kumar	000			P A HD NM L
Absent (1)	Adnan	10			P A HD NM L
Half Day (0)	Manisha Jain	11			P A HD NM L

Leave (0)	Hahsi Chopra	14			P A HD NM L
	Sooni Jain	15			P A HD NM L
	Isha Jain	16			P A HD NM L

8

Simplified Payroll

NextERP simplifies the management of various administrative functions like staff salaries, applicable allowances or deductions, fee payment updates and makes everything easily accessible.

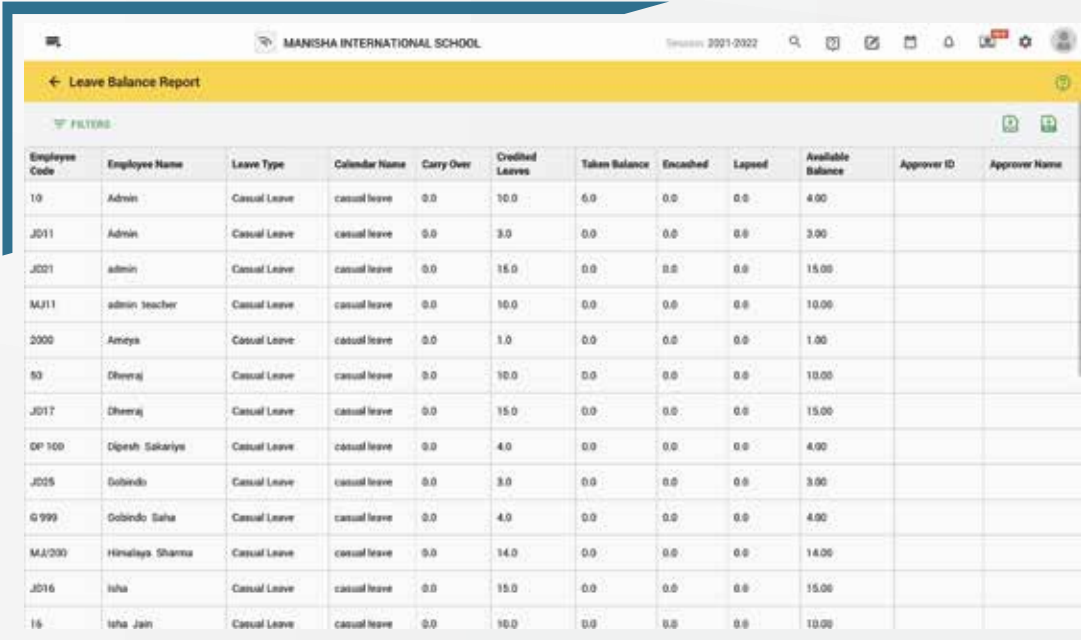

9

Organized Leave Management

The module expedites leave application and approval processes in just a few clicks. The leave policy is customised based on the department role and other parameters.

10

Excellent Front Office Management

NextERP automates the reception area requirements of your institute. It ensures thorough visitor management, well managed staff calendar-related activities through OTP, biometric identity tag generation, creating pickup passes for students, document management, etc.

11

Real-time Transport Tracking

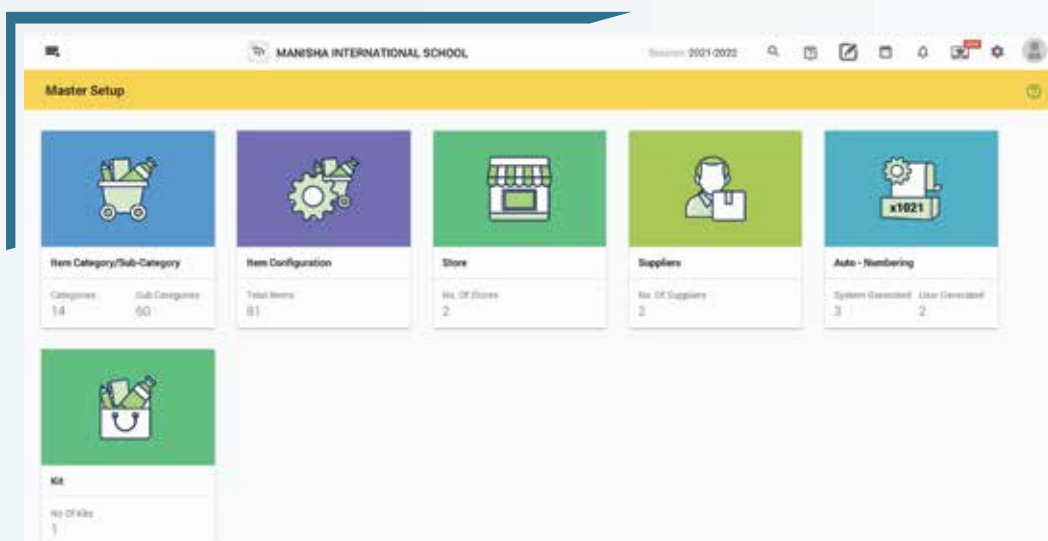

Students' commuting to and from school is no longer a worry for parents and teachers when there is NextERP. It provides real-time tracking of the route along with complete details of the driver. The speed of the school bus and the stops on the way to the destination can be monitored too.

**12**

Smooth Inventory Management

The inventory management module is designed to track purchase, sale and issue school-related stock more easily and efficiently. It looks into the available stock of important material at school and ensures transparent transactions. Issuing transfer certificates and circulating information to staff and students is also made easy.

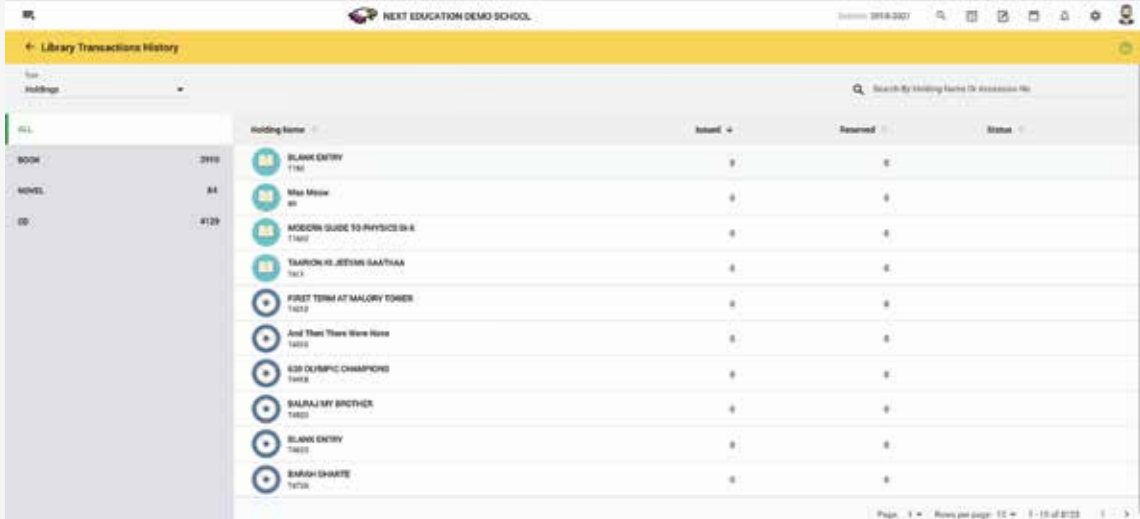

13

Advanced Library Management

This module transforms and enhances libraries with its sophisticated tools that eliminate manual work. It simplifies issuing of books while specifying the return policy clearly. A smart barcode reader quickens the search for books, also allowing reservation if needed. Additionally, there is a customised membership policy for students and teachers.

The screenshot shows the 'Library Transactions History' page. It features a sidebar with filters for 'ALL', 'BOOK', 'NOVEL', and 'CD'. The main table lists transactions with columns for 'Holding Name', 'Issued', 'Returned', and 'Status'. The table contains 10 rows of data, including items like 'BLANK ENTRY', 'Maz Mazin', 'MODERN GUIDE TO PHYSICS', and 'TAMRON K. JEEVAN SAATHA'.

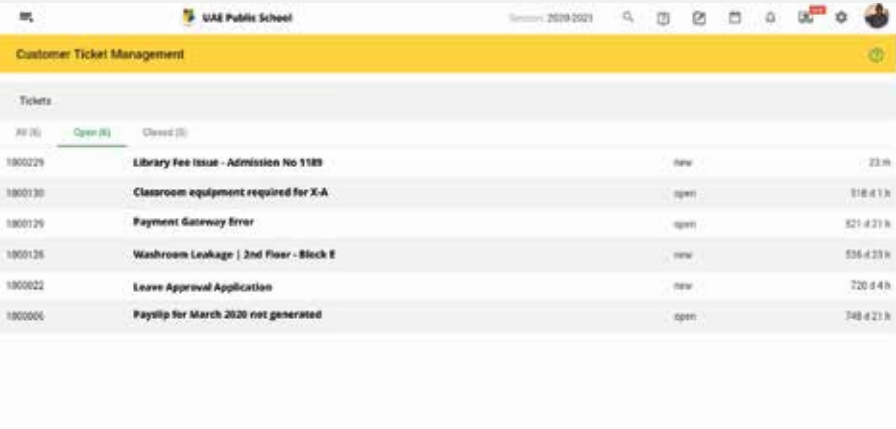

Holding Name	Issued	Returned	Status
BLANK ENTRY	11/11	11/11	
Maz Mazin	11/11	11/11	
MODERN GUIDE TO PHYSICS	11/11	11/11	
TAMRON K. JEEVAN SAATHA	11/11	11/11	
FIRST TERM AT MALORY TOWER	11/11	11/11	
And Then There Were None	11/11	11/11	
433 OLYMPIC CHAMPIONS	11/11	11/11	
RAJAJAY BROTHER	11/11	11/11	
BLANK ENTRY	11/11	11/11	
BAHAI SHARTE	11/11	11/11	

14

Ticket Management

Schools can now receive, track and close queries and issues from any of the stakeholders — parents, vendors and students. This module contains a Queue Management agent portal and customer ticket management to manage and resolve queries and complaints at the earliest. All conversations under the unique ticket ID are stored and can be referred to at a later point if required.

The screenshot shows the 'Customer Ticket Management' page. It displays a table of tickets with columns for 'Ticket ID', 'Status', 'Subject', and 'Time'. The table contains 7 rows of data, including tickets for 'Library Fee Issue', 'Classroom equipment required', 'Payment Gateway Error', 'Washroom Leakage', 'Leave Approval Application', and 'Payroll for March 2020 not generated'.

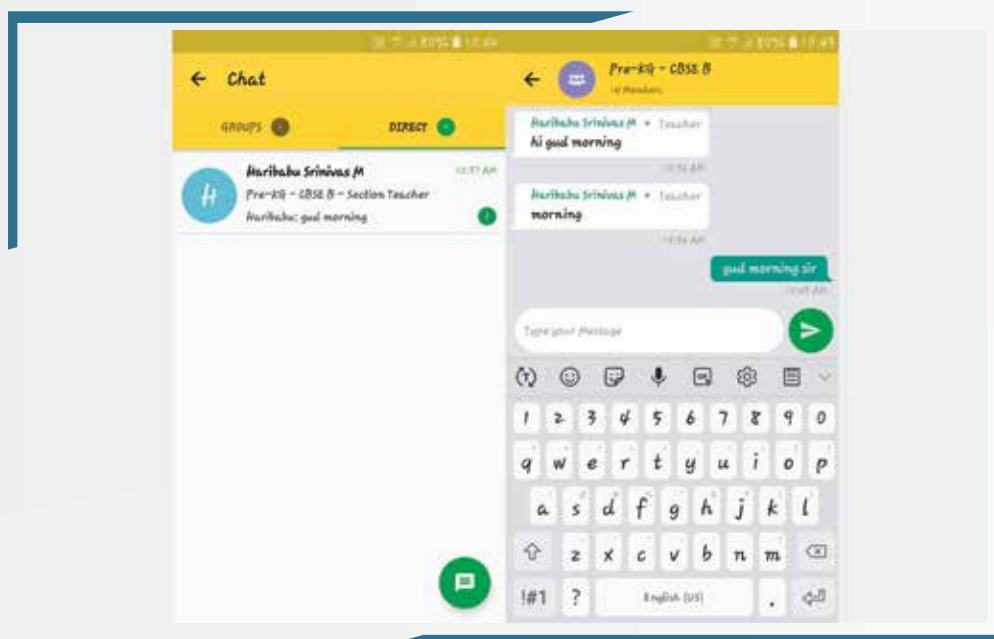

Ticket ID	Status	Subject	Time
1800229	new	Library Fee Issue - Admission No 1189	23 m
1800130	open	Classroom equipment required for X-A	518 d 1 h
1800129	open	Payment Gateway Error	521 d 21 h
1800126	new	Washroom Leakage 2nd Floor - Block E	536 d 23 h
1800022	new	Leave Approval Application	720 d 4 h
1800006	open	Payroll for March 2020 not generated	748 d 21 h

15

Effective Communication with In-App chat

NextERP ensures transparent, effective and smooth communication between all stakeholders with regular notifications, an in-app chat facility and timely reminders for fee payment, homework, assessments, etc.

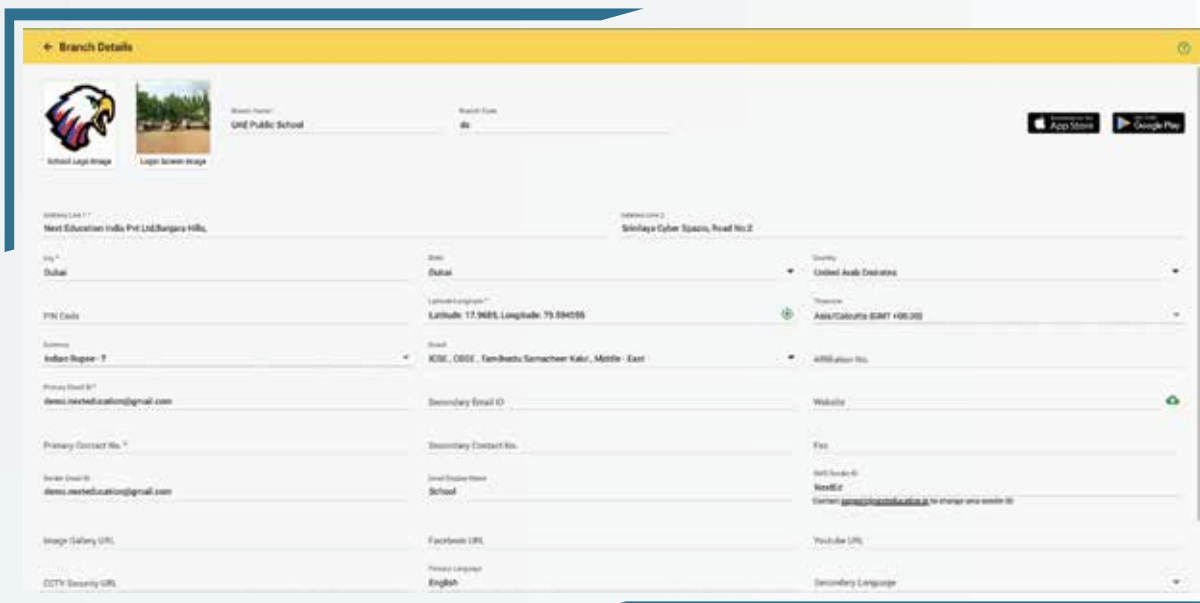

16

Support for Internationalisation

The application empowers schools to work with different currencies across time zones and number formats.

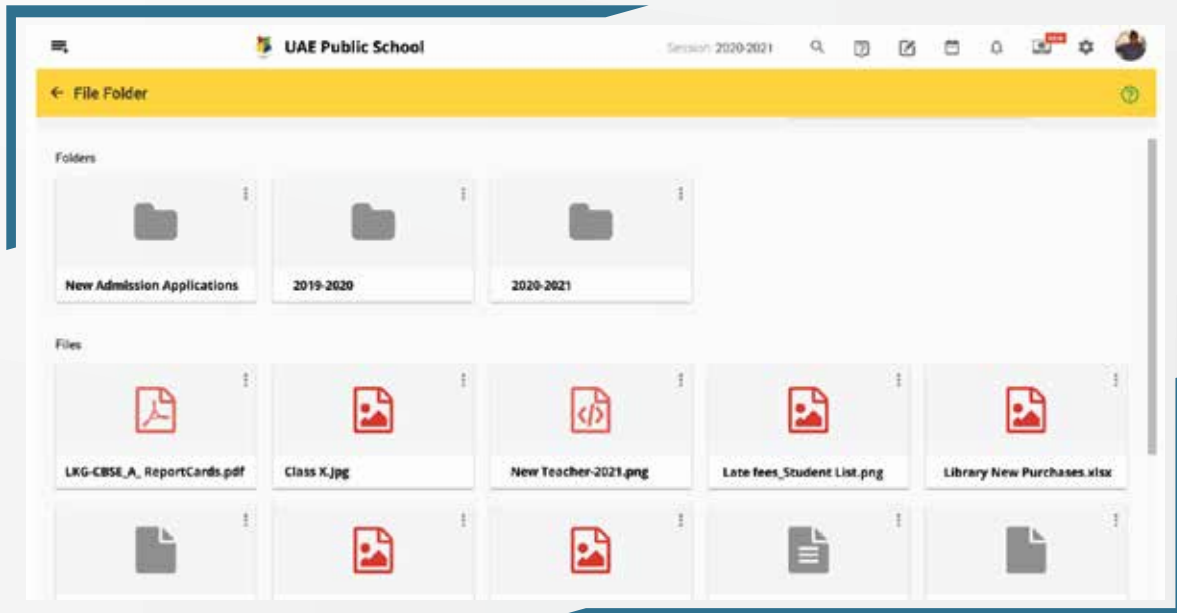

17

Folder / File Management

This module is an extensive collection of all the printed and filed documents generated within and outside the system that can be easily accessed.

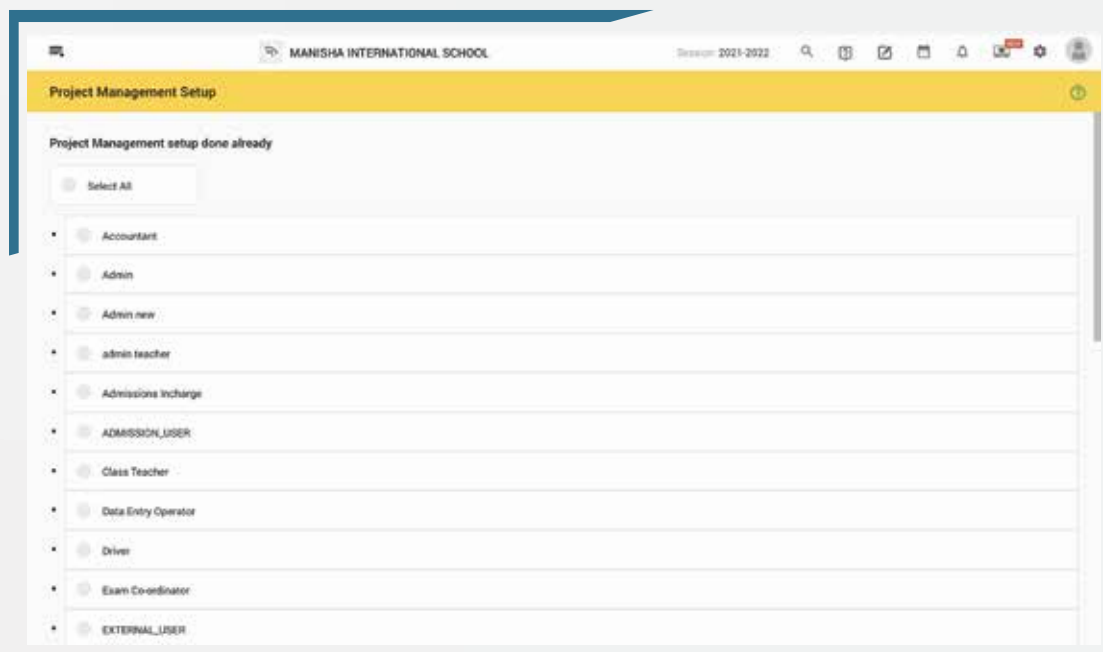

18

Project Management System

NLP smoothen the administrative and academic process of the schools by providing a flexible and configurable project management system.

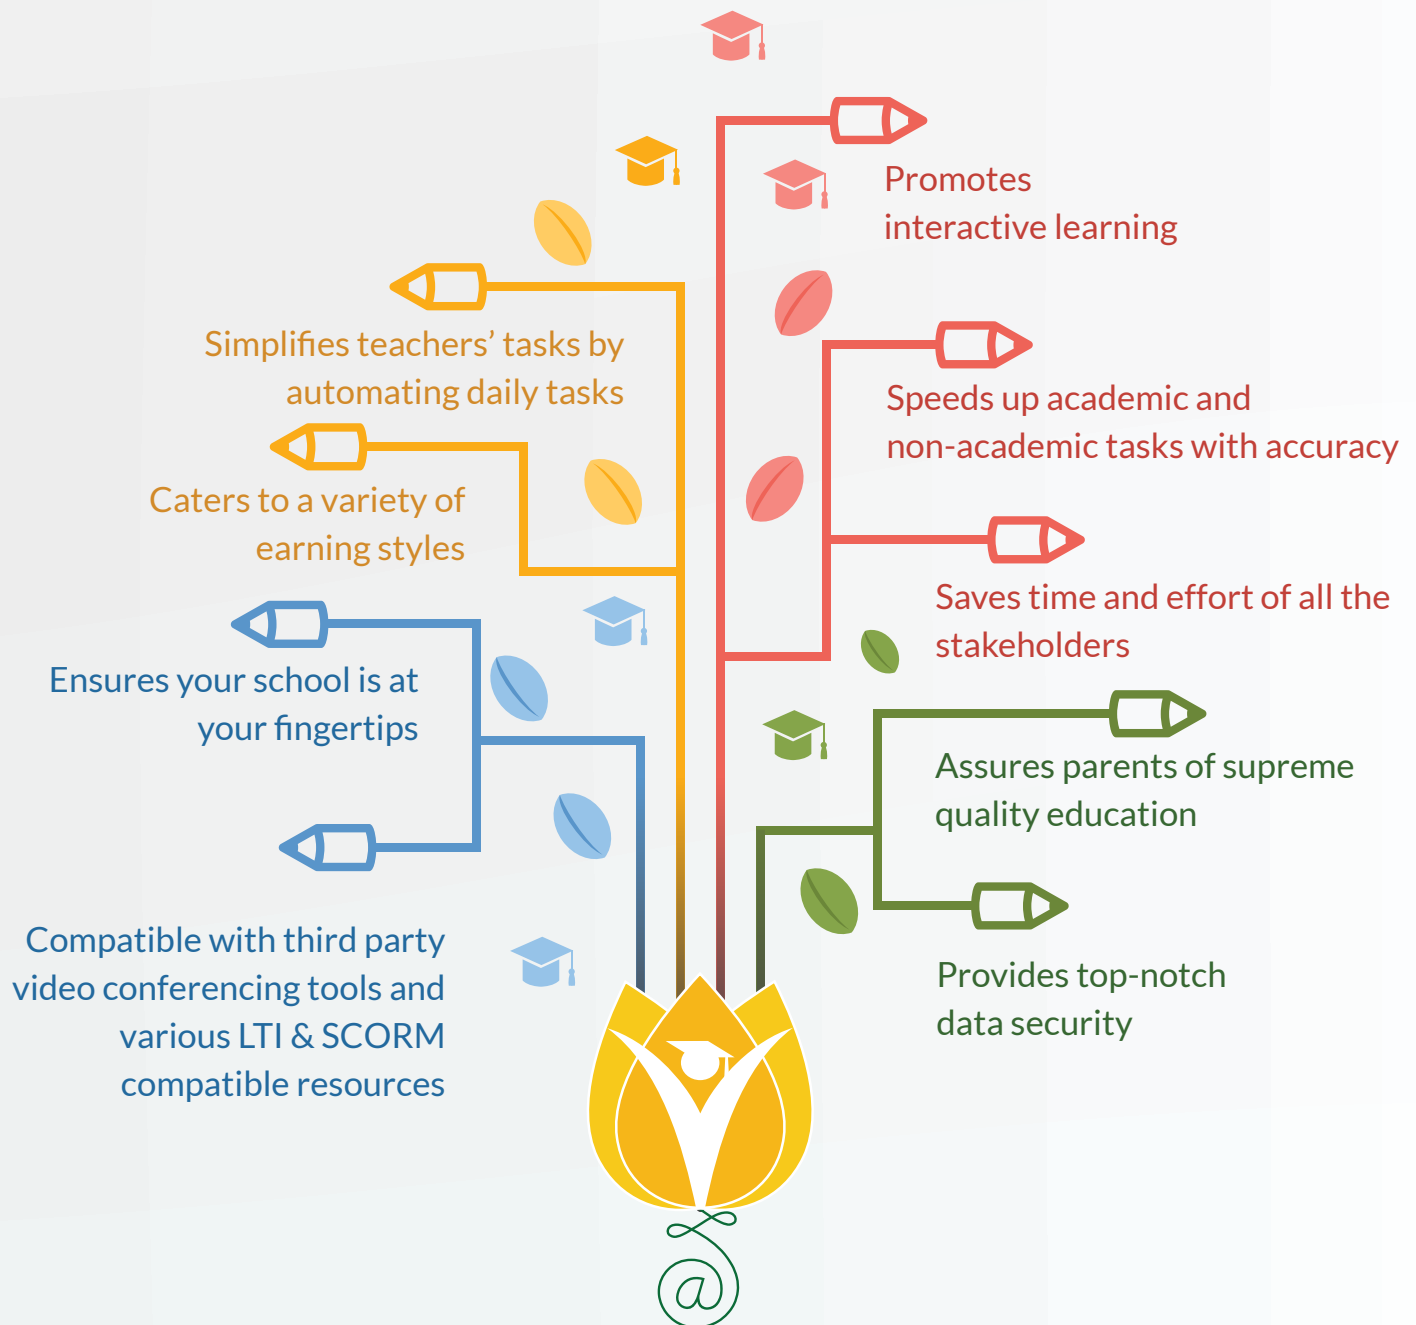

Why NLP ?
